**DETAILED ACTION**

***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1, claims 1, 2-6, wherein the sub lithographic features are substantially vertical columns;

Species 2, claims 1, 7-9, wherein there is a capping layer to form a pinched off structure;

Species 3, claims 1, 10-16, 33 wherein the sub lithographic template mask is a diblock copolymer nanotemplate;

Species 4, claims 1, 17-20, wherein the sub lithographic template mask is a metal deposition layer;

Species 5, claims 1, 21-22, 26, wherein metal is formed over a capping layer;

Species 6, claims 1, 24-25, wherein the sub lithographic features are substantially vertical pores;

Species 7, claims 1, 26, 28, wherein the sub lithographic features are backfilled with a second material than that of the insulation layer;

Species 8, claims 1, 27-30, wherein a sealing cap is provided over the sub lithographic features;

Species 9, claims 1, 31-32, wherein the sub lithographic template mask is a random hole pattern;

Species 10, claims 1, 34-35, wherein a supra lithographic mask is formed over or underneath the sublithographic mask.

Species 11, claims 36-37, wherein the blocking structure is formed over or under the sub lithographic template mask;

Species 12, claims 36, 38 wherein the sub lithographic feature includes a plurality of holes;

Species 13, claims 36, 39, wherein the etching step includes anisotropic and isotropic etching;

Species 14, claims 36, 40 wherein the sublithographic features include vertical columns and a plurality of holes;

Species 15, claims 36, 41, wherein there is a capping layer to form a pinched off structure;

Species 16, claims 36, 42, wherein the sub lithographic template mask is a diblock copolymer nanotemplate;

Species 17, claims 36, 43, wherein the sub lithographic template mask is a metal deposition layer;

Species 18, claims 36, 44, wherein the sub lithographic features are backfilled with a second material than that of the insulation layer;

Species 19, claims 36, 45, wherein a sealing cap is provided over the sub lithographic features;

Species 20, claims 36, 46 wherein the sub lithographic template mask is a random hole pattern;

Species 21, claims 36, 47-48, wherein insulation material is redeposited.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic to Species 1-10, and claim 36 is generic to Species 11-21.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
